Binxuan Yan

Boston, MA | 857-523-5523 | yan.binx@northeastern.edu | binxuanyan.dev
Availability: January — August 2027

EDUCATION

Northeastern University **Boston, MA**
Bachelor of Science in Computer Science and Game Development Expected Dec 2027

- **GPA:** 3.90/4.00
- **Honors:** Dean's List
- **Relevant Coursework:** Game Design Capstone, Game Concept Development, Rapid Idea Prototyping Games, Level Design and Game Architecture, Game Interface Design, Generative Game Design, Program Design and Implementation II, Game Programming, Programming in C++, Game Studio, Foundations of Game Design

WORK EXPERIENCE

Papergames INC. **Shanghai, China**
Game Client Developer Intern May 2026 – July 2026

- Contributed to maintenance of *Love and Deepspace* in Unity and Lua, including asset management and packaging
- Assisted with AssetBundle configuration and built a version comparison tool for resource analysis and report generation
- Validated multilingual UI layouts for overflow, wrapping, and truncation issues, and developed a tool to export results

Intelligent Medical Institute, Fudan University **Shanghai, China**
Research Intern June 2024 – August 2024

- Cleaned and preprocessed research datasets in Python to produce standardized inputs for analysis
- Automated data transformation and formatting workflows to reduce repetitive manual processing
- Developed reusable Python utilities for data validation, transformation, and consistency checks

PROJECTS

Chromatic Project
Game Developer January 2026 – April 2026

- Implemented core gameplay systems in Unity, including color-based mechanics and environmental interactions
- Built a color unlock progression system that updates world states and puzzle interactions
- Integrated art assets and UI elements with gameplay systems, ensuring consistent visual feedback and player interaction

Glass Ceiling Project
Game Developer September 2025 – December 2025

- Developed a horror puzzle game in Unity and C# centered on exploration and uncovering the world's secrets
- Built interaction mechanics, UI and audio control systems, delivering fully integrated features
- Optimized player interactions through iterative testing, enhancing playability and overall user experience

What Remains of Me Project
Game Developer September 2025 – December 2025

- Modified existing Unity systems to integrate new mechanics, including an alert system that triggers story progression
- Created and integrated game assets while contributing to gameplay programming and level design
- Tracked development tasks using Jira and wrote quality assurance scripts to test implemented features

LEADERSHIP EXPERIENCE

ISWorldLife
Assistant Project Manager April 2025 – Present

- Streamline tutor hiring by redesigning the interview process, improving candidate experience and efficiency
- Lead cross-functional teams to develop cost estimates supporting data-driven recommendations and budgeting
- Deliver foundational instruction in mathematics and physics, supporting student comprehension and study progress

SKILLS & INTERESTS

- **Programming Languages:** Java, C#, C++, Python, Lua, TypeScript
- **Tools:** Git/GitHub, Unity, Maya, Adobe Substance 3D Painter, Adobe Photoshop, Blender, Trello, Jira, Miro, Figma
- **Interests:** Video Games, Music, Movies, Musical Theatre, Traveling, Singing, Photography
- **Languages:** Mandarin (Native), Japanese (Beginner)
